## RE sets up CKD plant in Thailand, sixth worldwide

ROYAL ENFIELD HAS inaugurated its first fully owned and operated CKD (completely knocked down) assembly facility outside India, in Samut Prakan, Bangkok. While it already has five CKD plants worldwide (in Argentina, Bangladesh, Brazil, Columbia, and Nepal), this will be the company's first fully owned and operated

unit. With a 57,000 sq. ft. setup and an installed production capacity of over 30,000 units p.a., the plant will meet Thailand's demand before catering to neighbouring markets. Thailand has been a key market for RE, with the company reporting a growth of over 150 percent since its entry into the country.
